

Tank Reading Route Analysis Report

Last Modified on 05/11/2022 10:45 am EDT

Navigate to *Main Menu / Management Reports / Management Reports / #15.*

This is to be processed quarterly.

This report is designed to display the route, customer type, and delivery type associated to tanks delivered for a given time period. The starting percentage of the delivery is indicated to show the tank starting percent at the start of delivery to easily detect a tank run-out event.

When processing the report, specify the delivery type, or set the delivery type as 0 (zero) for All types.

When reviewing the report, note the Delivery Types associated to the tanks. Was it a true runout (k-factor tracked tank), or a Will Call customer type that did not call in with an accurate tank % or waited to call until they actually ran out? If it is a Julian delivery type, analyze the schedule associated to the tank.

Route	Customer	Delivery T	0%	% of Total 1 to 3%	% of Total 4 to 10%	% of Total 11 to 20%	% of Total 21 to 30%	% of Total 31+%	% of Total	Total Deliv	Total Gall	% Updates
