Map Settings

📓 🗄 🗇 🤣 🍇 🔀 🔍 🔍 🔗 🞇 🔚 🔛 🗞 🚱 🗎 🎟 🎺 🎯 🖨 🗸 🖉 .

- 1. Select the **Settings** icon located on the Map toolbar.
- 2. Choose each tab to customize.

Filters

Enable filters to specify which tanks display when scheduling tanks for delivery.

Settings
Filters GPS Tank Styles Map Styles
The following settings determine the visibility of tank objects. Tanks meeting only the minimum gallons condition display as an outline.
\checkmark Show auto-fill tanks which are between 0 % and 100 % full.
Show julian deliveries due within the next 5 days.
Mark julians critical if they are at least 5 days past due.
Show tanks with zero gallops to deliver.
Show call-in tanks with no active entry.
Show tanks that are on hold.
OR OR Show tanks with at least 100 estimated gallons available to fill.
OK Cancel

- Show auto-fill tanks which are between Display auto-fill tanks with an estimated percent left within the chosen range.
- Show Julian deliveries due within the next Display Julian deliveries that have a next scheduled date within the amount of days from today that is entered.
- Mark julians critical if they are at least This will modify the symbol of Julian deliveries to display with a bold border to indicate past due.
- Show tanks with zero gallons to deliver Display tanks where the estimated gallons to deliver is 0.00.
- Show call-in tanks with no active entry Display Call In Delivery Type tanks that do not currently have an active Call In assigned.
- Show tanks that are on hold Display tanks that are actively on hold.

GPS

GPS Settings are not actively used at this time.
