

EnergyMap - Table View and Box Selection Search

Last Modified on 02/27/2026 2:55 pm EST

Table View Search

Note: The search feature is CASE sensitive.

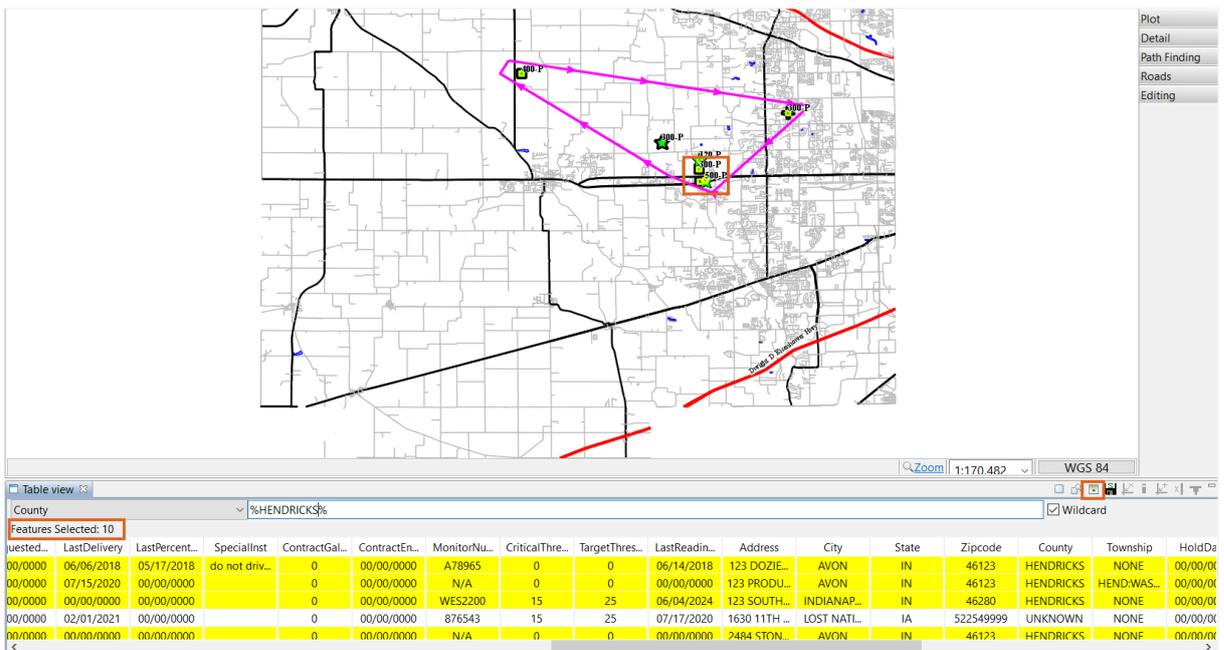

1. Highlight the appropriate layer to search.

2. Select from the drop-down in the *Table View* area. This is always defaulted to *Any*. Change the selection to be more specific if desired.
3. If performing a general search for street name or city, enter % (wildcard) before and after the word. This will find all items within that string.

If the system finds a match, it will display a yellow highlight in the table. It will also highlight the items on the map. *Features Selected* will display the number of items found. If multiple items exist, select the **Promote to top of List** icon.

Box Selection Search

Box Selection Search is used to see data for a specified area.

1. Select the icon in the *Table View* field.
2. Select and drag the mouse over the desired area on the map.
3. When released, the system will highlight those items in yellow and will display details in the *Table View*.
