

# EnergyMap - Table View and Box Selection Search

Last Modified on 08/12/2022 9:51 am EDT

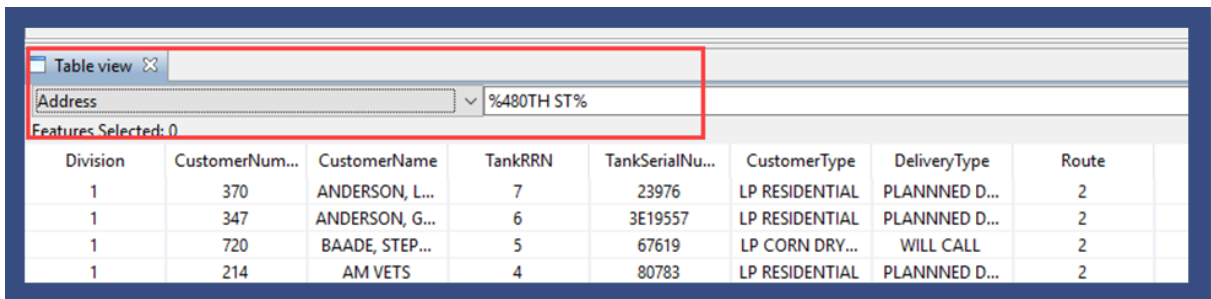

## Table View Search

**Note:** The search feature is CASE sensitive.

1. Highlight the appropriate layer to search.

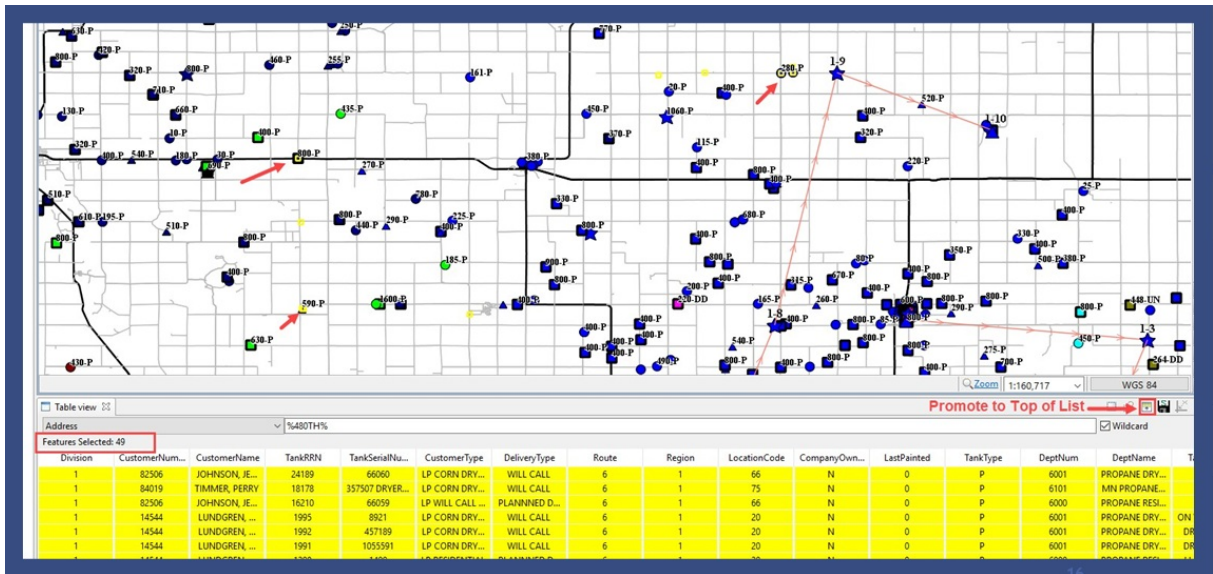

2. Select from the drop-down in the *Table View* area. This is always defaulted to *Any*. Change the selection to be more specific if desired.
3. If performing a general search for street name or city, enter % (wildcard) before and after the word. This will find all items within that string.

The screenshot shows the 'Table view' search interface. A search box contains the text '%480TH ST%'. Below the search box, the text 'Features Selected: 0' is displayed. A table with 8 columns and 4 rows is shown below. The columns are: Division, CustomerNum..., CustomerName, TankRRN, TankSerialNu..., CustomerType, DeliveryType, and Route.

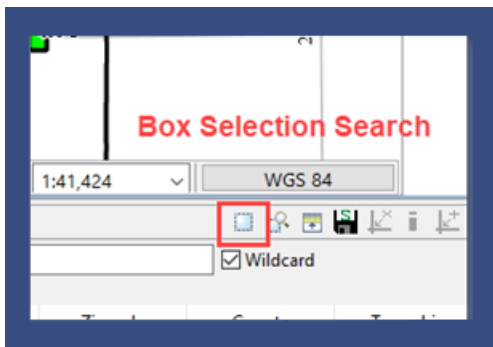

| Division | CustomerNum... | CustomerName   | TankRRN | TankSerialNu... | CustomerType   | DeliveryType | Route |
|----------|----------------|----------------|---------|-----------------|----------------|--------------|-------|
| 1        | 370            | ANDERSON, L... | 7       | 23976           | LP RESIDENTIAL | PLANNED D... | 2     |
| 1        | 347            | ANDERSON, G... | 6       | 3E19557         | LP RESIDENTIAL | PLANNED D... | 2     |
| 1        | 720            | BAADE, STEP... | 5       | 67619           | LP CORN DRY... | WILL CALL    | 2     |
| 1        | 214            | AM VETS        | 4       | 80783           | LP RESIDENTIAL | PLANNED D... | 2     |

If the system finds a match, it will display a yellow highlight in the table. It will also highlight the items on the map. *Features Selected* will display the number of items found. If multiple items exist, select the **Promote to top of List** icon.

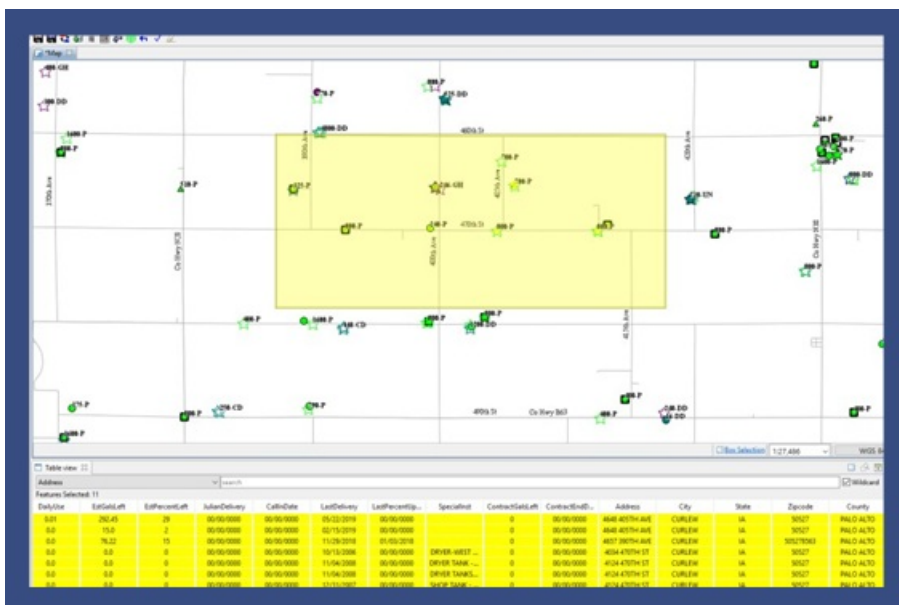

## Box Selection Search

Box Selection Search is used to see data for a specified area.

1. Select the icon in the *Table View* field.
2. Select and drag the mouse over the desired area on the map.
3. When released, the system will highlight those items in yellow and will display details in the *Table View*.

In general, if unable to see the highlighted items on the map, select the **Show Selected Items** icon.
