

EnergyMap - Replot a Tank

Last Modified on 02/24/2026 11:17 am EST

Tank Plotted Incorrectly

1. Select the appropriate Tank Layer located on the *Layers* tab (*Propane* or *Other Non-Propane Tanks*).

2. Select the **Editing** tool located on the EnergyMap Palette.
3. Choose **Edit Geometry**.

4. Position the *Edit* symbol directly over the tank and select.
5. Cross hairs will appear. Select and drag the tank to the new position on the map.
6. Select again to commit the tank to the new position on the map.
