

Rack Price Code Updates

Last Modified on 11/01/2023 1:02 pm EDT

Rack Codes give the ability to update multiple Price Codes at one time by using the Update Rack Pricing utility within Energy Force. Additionally, if contract pricing fluctuates, use the Rack Code utility to update contract pricing so that it will communicate to EnergyTrack handheld programs.

The Rack Code must first be set up in the Rack Code Maintenance table before it can be applied to a Price Code. To access the table, go to *Main Menu / Supervisor Menu / Maintenance Menu / Maintenance Tables / Rack Code*.
