

# Required RTM Maintenance Tables

Last Modified on 03/07/2025 4:10 pm EST

Prior to adding Remote Tank Monitors to a customer tank, the following maintenance tables must exist in Energy Force.

## Meter Types

A support representative will assist with the setup of this table if the RTM type does not exist. Meter Type numbers and descriptions may vary per location.

Type	Manufacturer Number	Manufacturer Name
M	4	WESROC
M	5	CENTERON
M	6	PEDIGREE
M	7	SILICON
M	8	ENERTRAC
M	9	OTODATA
M	10	TANK UTILITY
M	11	ISA-TELSEN
M	12	SKYBITZ
T	1	AMERICAN TANK AND WELDING
T	2	BUTLER
T	3	QUALITY

## Meter Cycle Code

The *Remote Tank Monitor Setup* screen requires a Meter Cycle Code for meter and consumption billing. This code must exist in order to add a monitor.

1. Navigate to *Main Menu / Supervisor / Maintenance Menu / Maintenance Tables*.
2. Select **Meter Cycle Code**.
3. Select *Edit/Create* in the *Mode* section and select **Continue**.

8. Select **Save** when finished and return to the Main Menu.

## Tank & Meter Manufacturer

*Tank and Meter Manufacturers* is a feature in the Inventory Setup program that gives the ability to identify the manufacturer of the Remote Tank Monitor, allowing tracking inventory by Type.

1. Navigate to *Main Menu / Tank and Meter Inventory Menu / Tank/Meter Manufacturers*.
2. Select **Create**.
3. Enter **M** for Monitor.

Type	Manufacturer Number	Manufacturer Name
M	4	WESROC
M	5	CENTERON
M	6	PEDIGREE
M	7	SILICON
M	8	ENERTRAC
M	9	OTODATA
M	10	TANK UTILITY
M	11	ISA-TELSEN
M	12	SKYBITZ
T	1	AMERICAN TANK AND WELDING
T	2	BUTLER
T	3	QUALITY

Modify Create Cancel

4. Enter a *Manufacturer Number*. This can be any number as long as it does not already exist in the file.
5. Enter the *Manufacturer Name*.
6. Select **Save** when finished and return to the Main Menu.
