

Price Code Update

Last Modified on 06/01/2022 5:12 pm EDT

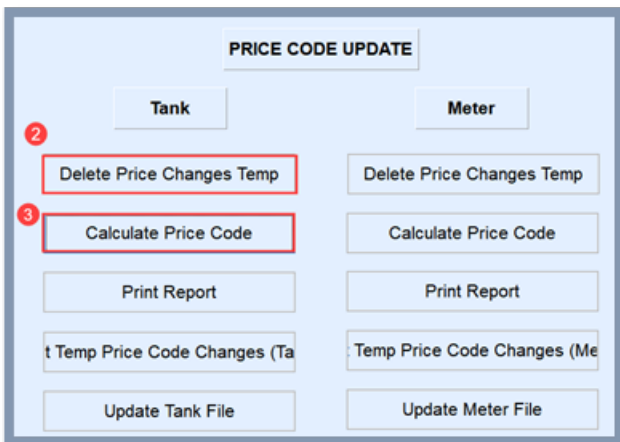

This program is designed to review history for tanks that are associated with a tiered-gallon Price Code based on gallons. If the *Allow Price Changes* field in the *Tank Information* screen is set to Yes and the tank is tied to a tiered-gallon Price Code, the program will process and recommend a new tier based on delivered gallons during the date range processed.

This program also processes Meter Codes as well if chosen.

1. Select **Price Code Update**.

2. First, select **Delete Price Changes Temp**. This will clear the program of any previously processed routines.

3. Select **Calculate Price Code**.
4. Enter the *Division* range. Leave as 1 to 9999 to process all Divisions.

Date Tank Set Prior To One Year

Division ABC PROPANE COMPANY

to

Date to

Price Code (0 for all price codes)

5. Enter the history *Date* range to base gallon pricing.
6. Enter a *Price Code* or leave as 0 for all Price Codes.
7. Select **Process**. Once finished, it will return to the *Price Code Update* screen.
 - Because the system is searching history for thousands of tanks, this process could take a few minutes.
8. Select **Edit Temp Price Code Changes (Tank)**.

Tank

Delete Get Divisions

Start Division ABC PROPANE COMPANY

End Division

Print Report

8 Edit Temp Price Code Changes (Tank)

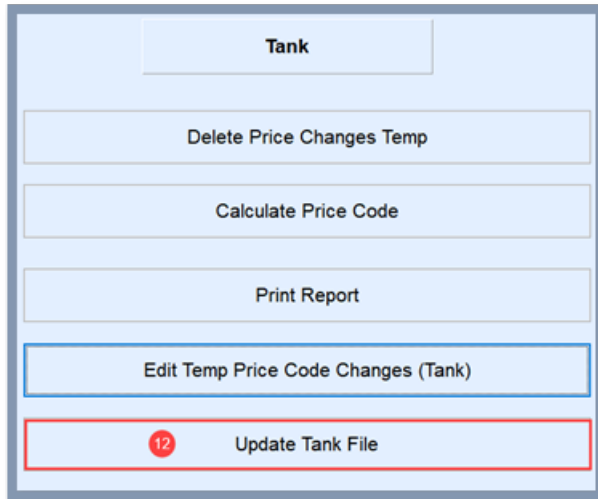

Update Tank File

- Additionally, select **Print Report** to review results on a printed form.
9. Enter the *Starting* and *Ending Division* and select **Process**. The *Edit Price Code Changes* screen will display.
 10. Review the *Old Cd*, *Old Tier*, *New Cd*, and *New Tier* columns.

Div	Customer #	Name	Tank Serial Number	Old Cd	Old Tier	Gals Used	New Cd	New Tier
1	10081	JONES,MATT	DB#1	1	A	0	1	E
1	10084	HUNT,SAM	123	1	A	400	1	D

1. If the *New Tier* displays an *E*, it is an indicator that the tank/customer will continue to have the current pricing tier.

2. If the *New Tier* does not display an *E*, then the new Price Code will take effect should the program be allowed to process.
11. If the tier should not change, press **Ctrl+M** on the keyboard to modify the *New Tier* to its current tier or press **F3** to remove the customer/tank from the screen. Press **ESC** when finished.
12. Select **Update Tank File** and enter the *Starting* and *Ending Divisions*. The program will process and update the tanks to the new pricing tiers.

13. Press **ESC** when the program has finished processing.
