

Presets - Propane

Last Modified on 11/01/2023 1:04 pm EDT

If the *Call In/Hold* tab on the *Tank* screen is highlighted in blue, it indicates that there is an active Call In for the tank. When this tab is selected, any preset amount will be listed in orange above the *Comment* field. If using an LCR meter that is configured for preset deliveries, preset gallons will be sent to EnergyTrack from the *Call In* screen (*Minimum Gallon* entry in Energy Force). When the register reaches the number of gallons entered for the Call In, the meter will stop pumping automatically.

Tank Serial Number	Type	Size	Tank Name	Last Delivery
442638	P	500		12/28/13

HYLAND, STEVE M.	Bus Owns	Y	Add Comment	Deliver	Back
------------------	----------	---	-------------	---------	------

Route	Contracts	Directions	Call In/Hold	Update %
-------	-----------	------------	--------------	----------

Estimated Percent:	60	Preset Gallons:	200	Immediate Fill?	N
--------------------	----	-----------------	-----	-----------------	---

Comment: Steve only wants the 200 gallon minimum delivered the next time he is due for a delivery since he is out of contract.

Call In: 01/09/14 08:14:20 Entered By: ROB

Hold: 00/00/00 0

1. With the tank highlighted, select **Deliver**. This will display the *Multi-Pumping* screen.
2. The Preset Gallons must be the first product pumped in order for the register to stop at the correct number of gallons.
 - o If more than one delivery is required for the customer, pump the gallons after the initial preset delivery gallons.
 - o If the customer account has more than one tank with preset gallons, the tickets must be invoiced separately rather than on one Invoice.
3. The register will stop at the preset amount. Turn the register knob to *Print* to finalize the delivery gallons.
4. Select **Finished Pumping** on the *Multi-Delivery* screen and complete the Invoice as usual.
