

Calculator Feature - Propane

Last Modified on 03/02/2026 5:56 pm EST

The **Calculator** button located within the *Tank* screen allows the driver to enter *Total Dollars to spend* to aid in determining the number of gallons to pump during a delivery. The system calculates the number of gallons to deliver based on the product, price, and taxes associated with the tank. The driver can also enter *Gallons to Deliver* to determine the total price, including taxes, for the selected gallons.

1. Highlight the tank and select **Calculator**.

The screenshot shows the 'Tank' screen with search criteria set to 'Customer'. The 'Limit' field is highlighted with a red box, and the 'Calculator' button in the 'Other Info' section is also highlighted with a red box.

Serial#	Type	Tank Name	Size
983028	P	West Farm	1000.00

2. Tap in the *Total Dollars to Spend* or *Gallons to Deliver* field, and select **Calculate**.

Calculate Dollars

The dialog box shows the following fields and values:

Total Dollars To Spend	\$0.00
Dollars To Spend	\$0.00
Total Tax	\$0.00
Price Per Gallon	1.7500
Gallons To Deliver	0

Buttons: Close, Deliver, Calculate

3. The system will calculate the number of gallons and dollars to spend.
4. Choose **Deliver Gallons** to preset the gallons for delivery or **Cancel** to return to the *Tank* screen.

Note: The *Calculator* program only calculates based on gallons. Regulatory fees, labor, etc. are not included in the calculation. If non-pumpable items will be added to the Invoice, those amounts should be subtracted from the *Total*

Dollars to spend before selecting **Calculate**.
