End Shift - Refined Fuels

If interfaced with an electronic register such as an LCR II, EMH, Neptune, or Mid Com, place the truck computer in the docking station before selecting to End Shift.

1. Select **End Shift**.

2. Enter the current *Odometer* reading and select the checkbox.

3. Verify (or enter if not interfaced with an electronic register) the *Totalizer* reading and select the checkbox.

4. Verify ending *Gallons* and tap the *Verification* check box. If a Post Trip Inspection is required by management, select **Truck Inspection** and follow the directions outlined here.

5. Tap **Continue** when completed. If not interfaced with an electronic register, continue to Step 6.

6. Choose the number of copies to print.

7. A purge routine will process and the main menu of EnergyTrack will display when finished. This routine removes EnergyTrack items older than 30 days.

8. It is advised to select **Communicate** once Wi-Fi is available to send trip information to Energy Force.
