

Presets - Refined Fuels

Last Modified on 03/04/2025 11:50 am EST

If the **Call In** button on the *Customer/Tank* screen is highlighted in blue, it indicates that there is an active Call In for the tank. When a Preset is present then the **Call In** button will be outlined in orange.

KIHNCHESTER, MN 23620-

Return to the *Main Menu* to select **Call In Delivery** to utilize the Preset.

If using an LCR meter that is configured for preset deliveries, preset gallons will be sent to EnergyTrack from the *Call In* screen (*Minimum Gallon* entry in Energy Force). When the register reaches the number of gallons entered for the Call In, the meter will stop pumping automatically.

1. Highlight the Call In.
2. Select **Deliver**.

3. The Preset Gallons must be the first product pumped in order for the register to stop at the correct number of gallons.
 - o If more than one delivery is required for the customer, pump the gallons after the initial preset delivery gallons.
 - o If the customer account has more than one tank with preset gallons, the tickets must be invoiced separately rather than on one Invoice.
4. The register will stop at the preset amount. Turn the register knob to *Print* to finalize the delivery gallons.
5. Select **Finished Pumping** on the *Multi-Delivery* screen and complete the Invoice as usual.
