The **Calculator** button located within the *Tank* screen allows the driver to enter *Total Dollars to spend* to aid in determining the number of gallons to pump during a delivery. The system calculates the number of gallons to deliver based on the product, price, and taxes associated with the tank. The driver can also enter *Gallons to Deliver* to determine the total price, including taxes, for the selected gallons.

1. Highlight the tank and select **Calculator**.

The screenshot shows the 'Choose Search Criteria' screen with 'Customer' selected. The 'Customer# 100' section displays details for JACOBI, RYAN, including phone, limit (\$0.00), current balance (\$762.45), and terms (Due the 15th). A table lists tanks with columns for Serial#, Type, Tank Name, and Size. The 'Tank RRN 1799' section shows delivery address (8634 Bradtke Burg, SALEM, SD), customer type (PROPANE - RESIDENTIAL), and delivery type (WILL CALL). The 'Other Info' section shows product (LP GAS-HEATING), price (\$1.7500), route (DANVILLE LP), and location (DANVILLE). The 'Calculator' button is highlighted in red.
