The **Calculator** button located within the *Tank* screen allows the driver to enter *Total Dollars to spend* to aid in determining the number of gallons to pump during a delivery. The system calculates the number of gallons to deliver based on the product, price, and taxes associated with the tank. The driver can also enter *Gallons to Deliver* to determine the total price, including taxes, for the selected gallons.

1. Highlight the tank and select **Calculator**.
