Energy Force

- **BRUT-263 / Post Re-Engineered ET** – Selecting **Post Re-Engineered ET** works as expected.

- **BRUT-295 / Tank Export File** – Upon selecting **Export** for the Daily Tank Export at *Posting Menu / Daily Clear / Daily Tank Export*, a message will display stating *Do you want to include all tanks with this export? If you select No, only modified tanks will be included.* Choose yes the first time to create an entry in the newly created log. Selecting **Yes** runs as usual with all tanks included. **No** runs with only modified tanks included.
  Note: This is for both the Daily Tank Export and the Daily Tank Export/Alt ID and affects newly created and modified tanks.

- **BRUT-341 / Contract Imports** – Contract import processes have been added to the Audit Log at *Supervisor Menu / Processes / Audit Menu / Audit Log*.

- **BRUT-361 / Email Call Ins** – The ability to email Call Ins to drivers has been added to Energy Force. The Email Host information must be added first. See BRUT-374 below for more information. The driver emails then need to be entered at *Supervisor Menu / Maintenance Menu / Maintenance Tables / Driver Emails*. Once the setup is complete, users can select **Email** from the *Call In Entry* screen (1) and select the Driver who should receive the email (2).

- **BRUT-364 / Buyout Functionality** – Buyout functionality has been added to the Deferred Billing Program. User security for Deferred Billing has also been implemented.

- **BRUT-367 / Daily Tank Export** – File names for the Daily Tank Export and Daily Tank Export/Alt ID have been updated to include a timestamp of when the file was processed. The new file name layout is *TankExpYYYYMMDDHHMMSS* for the tank export and *TankExpAltIDYYYYMMDDHHSS*. For example, a file called *TankExp20220915130335* is the tank export processed on 09/15/2022 at 1:03:35 PM.

- **BRUT-374 / Email Utility** – An email utility has been added to Energy Force. *Email Host* information will need to be updated and a new user right, *EMAILMAINT*, is required to access the Email Client Maintenance screen at *Main Menu / Supervisor Menu / Maintenance Menu / Email Client Maintenance*.

EnergyTrack

- **BRUT-390 / LPG Safety Ticklers** – LPG Safety Ticklers are working as expected.
