Energy Force

- **BRUT-429 / User Rights Export Utility** – Energy Force now has an export at *Supervisor Menu / Processes / Utility / User Manager Export* to export all users and create CSV files for each user listing out all roles/rights per user. This gives the ability to select the location of where the files are to be saved. A new user right is required.
- **BRUT-473 / Tank Monitor Analysis Report** – The Tank Monitor Analysis Report is working as expected when accounts have inactive monitors.
- **BRUT-485 / User Rights** – User Roles/Rights have been masked in Energy Force.
