Updating Energy Force

Last Modified on 10/31/2023 3:10 pm EDT

To update Energy Force or access the Energy Force release notes from within the application:

- 1. Go to Help / Check for Update in Energy Force.
- 2. The Current version and the New version numbers of Energy Force displays.

- 3. Select Version Documentation to navigate to the Release Notes page in the Energy Force Help Center.
- 4. Those who have access can select Install to upgrade to the newest version of Energy Force.
- 5. Upon selecting Install, the Update Prerequisites window will display. Review the information provided and

select Yes to continue.

Update P	Prerequisites	\times
4	The following items should be verified/completed before proceeding for a complete and successful update. Continuing on without checking the following items could result in a failed update.
