Energy Force

- **BRUT-207 / Terms of Use and Privacy Policy** – The Terms of Use and Privacy Policy have been added to Energy Force at *Help / About*.

- **BRUT-222 / Customer Number when Voiding** – The window displaying available tickets no longer covers the Customer Number when voiding a ticket.

- **BRUT-483 / Federal Taxes Split Contract** – When invoices have more than five taxes, the split bill and contract are posting the taxes as expected.

- **BRUT-511 / Schedule Import** – OptimizerPlus schedules import into Energy Force when the table does not exist or the table exists but is empty.

- **BRUT-516 / SDD Notification** – The SDD process now sends notifications when the server is updated to TLS1.2.

- **BRUT-525 / Improved Update Process** – The update process has been improved with the following changes:
  - The update process will copy the update files to the same directory from which the program is initiated; it is no longer hard coded to the *App* folder.
  - An additional check was added to allow for non-EnergyService users.
  - A list of Update Prerequisites was added.
  - Log files are created in the *Ctls93\DD85\Logs* folder. Log records now include the user along with acceptance or declination on the prerequisites.
  - Old update files with the same name are deleted at the beginning of the update process.
  - Verbiage has been updated to a better description during the update.
  - An additional check was added to see if Energy Force.exe is currently in use in any non-local instances. This informs the user running the update that the update cannot proceed while the program is in use and will cancel the update process.

- **BRUT-527 / Merchant Maintenance** – Options have been added to the Online Merchant Setup to identify if credit card and/or ACH payments are accepted at *Supervisor Menu / Setup Options / EF Portal Setup / Online Merchant Setup.*

EnergyTrack

- **BRUT-363 / NTEP Certification Name** – The NTEP Certification Name has been updated to *Software Solutions Integrated, LLC*.
