★ – Key Highlight

Energy Force

- ★ **SKYR-638 / Import Customers** – Energy Force and Agvance users can update customers without running the Export\Import processes by turning on two new System Settings and utilizing the **Import Customers** button on the *Customer Maintenance* screen in Energy Force. [Read More!](#)
- **SKYR-681 / Active Directory Login Alert** – An alert displays, while using Active Directory logins to Energy Force, if the Main Menu right is not available for that database and access to Energy Force will not be allowed.
- **SKYR-684 / Character Limits Removed** – Character limitation was removed completely from the file path and file name for reports on the *Data Export Interface Menu* . Previously the full path was limited to 100 characters with the filename itself (not including the extension) was limited to 10.
- **SKYR-715 / Additional Security for Daily Tank Export Process and Updated Menu Layout** – A new user right has been added for the **Daily Tank Export** and **Daily Tank Export/Alt ID** located on the *Daily Clear* Menu. The *Daily Clear* Menu has also been rearranged so that the **Daily Tank Export** and **Daily Tank Export/Alt ID** are together on the right side of the menu.

- **SKYR-717 / Energy Force Password Limitations** – Energy Force password length has been increased from

20 to 50 characters.

- **SKYR-732 / Optimizer Report** – Optimizer Schedule Compliance Detail report works as expected when Excluding Saturdays and Sundays.

Energy Track

🌟 **SKYR-730 / RET Leak Check Option** – New RET option 41 allows drivers to change Leak Check dates within Energy Track without processing an Out of Gas. When a new download to RET is generated or by accessing Re-Engineered Energy Track under the Energy Track Maintenance Menu, RET option 41 is defaulted to N. This new feature is only available in V2 of Energy Track. [Read More!](#)
