18.4.2.0 | 12.02.2025

Last Modified on 12/02/2025 5:45 pm EST

Energy Force

- **SKYR-58 / Purchase Order Number Field on Call-in Screen –** A Purchase Order number can be entered in the *PO Number* field on the *Call-in* screen and will carry through to manual sales posting and EnergyTrack. When a tank has a standing PO number, the *PO Number* field on the *Call-in* screen will populate but can be changed and updated for the Call-in delivery.

  Note: The PO number on the *Call-in* screen will only apply to the delivery against the call-in and will not change the standing PO Number on the Customers Tank.

- **SKYR-792 / Automated Tank Import to Agvance** – Mutual Energy Force and Agvance customers can automatically import tanks without running the export/import processes. **Read more!**

- **SKYR-909 / Julian Schedule Auto Tasks** – Julian schedule with *Start Date*, *Delivery Date* and *Date Posted* the same will not lock up the posting routine in Manual Sales Entry or Post Re-engineered EnergyTrack.

- **SKYR-959 / GPS Coordinates** – *GPS Tank Coordinates* tab on the Tank Info screen continues to display coordinates when the tank Type has been modified.

- **SKYR-1072 / Split Modification** – Modifying a split updates the *Last Modified Date* for a tank as expected.

EnergyTrack

- **SKYR-1022 / Non-Pumpable Price Entry** – Price can be updated from $0.00 on Non-Pumpable products when the option to allow driver to change a price is *No*.
