Energy Force

- **SKYR-1011 / Automatic Contract/Bookings Import for Mutual Energy Force and Agvance Customers** – Energy Force now has a Contract/Booking Import for mutual Energy Force and Agvance customers without having to run the Export/Import process. Only new bookings, not marked as exported, will attempt to import. Two new Agvance Preferences are automatically created for *Import Bookings From Agvance* and *Attach Tanks to Bookings* and default to N. To run the import these setting need to be changed to Y located under the *Supervisor Menu / Setup Options / Agvance Setup Menu / Agvance Preferences*. [Read More](#).
 - **Why** – To alleviate running a manual Booking Import process.
 - **When/Where** – *Supervisor Menu / Setup Options / Agvance Setup Menu / Agvance Preferences*
 - **Action needed** – Agvance Preference needs to be changed to Y in order to run the import.
- **SKYR-1012 / Agvance Booking Import Automated Background Task** – Agvance Booking Import has been added to the Automated Background Tasks to run at scheduled intervals throughout the day alleviating a manual process. [Read More](#).
 - **Why** – To alleviate running a manual Booking Import process.
 - **When/Where** – *Main Menu / Supervisor Menu / Maintenance Menu / Automated Task Menu / Background Tasks*
 - **Action needed** – No action required.
- **SKYR-1102 / Energy Assistance Contract Rollover Tax** – Energy Assistance Non-Taxable Contract with an overage to a taxable Tank applies taxes correctly on the overage during Manual Sales Posting.
 - **When/Where** – Manual Sales Posting on an Energy Assistance non-taxable Contract with an overage.
 - **Action Needed** – No action required.

EnergyTrack

- **SKYR-665 / Allow Driver to Change Contract Overage Price** – Energy Track allows Drivers to update the Prices on Contract Overage Gallons. Change New RET Option #42 from default N to Y to allow drivers to change contract overage prices. [Read More](#).
 - **When/Where** – This option will be auto created the first time a download is created or by accessing the RET Options at *Supervisor Menu / Maintenance Menu / Energy Track Menu / Re-Engineered Energy Track*.
 - **Action needed** – RET Option 42 will need changed from N to Y.
