

# Version 1.4.8.3

Last Modified on 03/17/2026 9:26 am EDT

- **SKYR-1198 / Energy Map Updates** – When generating a route on the map using a truck that has an existing schedule, an option to create an additional run or to replace the existing schedule has been corrected.
  - **Why** – Additional run was not writing back to Energy Force, and replacing the schedule was merging the new schedule with existing schedules.
  - **When\Where** – **Energy Map** and **Print Map Scheduling** located under *Route Scheduling* Menu.
  - **Action Required** – No action required.
