Energy Force

- **SKYR-1263 / Cash Rounding Rules** – A new table has been created for users to create Cash Rounding Rules.
 - **Why** – Pennies have been discontinued and many sales don't end in increments of \$.05, causing a need to account for the rounding of cash payments. This table allows for creation of various rounding scenarios.
 - **When/Where** – *Supervisor Menu / Setup Options / Cash Rounding Rules*
 - **Action Needed** – Setup a new Department for the amount a payment was rounded and fill out the Cash Rounding Rules table.
- **SKYR-1312 / Customer Import Speed/Sync** – Speed of the Customer Import between Energy Force and Agvance has been increased. All customers will sync not just the new and or modified customers. If *Alternate ID's* are used, the Energy Force *Customer Number* must be filled in for the customer to be synced. Only 1 log file will be generated and will be overwritten daily.
 - **Why** – To alleviate timeout issues on large databases.
 - **When/Where** – Import Customers on Customer Maintenance and the Background Task on the Automated Tasks Menu.
 - **Action Needed** – No action required.
- **SKYR-1318 / Tank Import Updates** – Tank Import between Energy Force and Agvance has added the *Last Delivery Date*, *Tank Owner Name* and the *Tank Directions*. If a new tank is created in Energy Force and the *Last Delivery Date* is left as 00/00/0000, the *Last Delivery Date* in Agvance will populate with the current date. The *Owner* in Agvance will be populated with the *Customer Name* in Energy Force, if the name is longer than 30 characters it will be truncated to 30.
 - **Why** – Tanks in Agvance will have more detail and the applications are more linked up.
 - **When/Where** – Manual Tank Sync located at the *Posting Menu / Daily Clear / Daily Tank Export* and the automated process located at *Supervisor Menu / Maintenance Menu / Automated Task Menu / Background Tasks*.
 - **Action Needed** – No action required.
