Energy Force

- **SKYR-222 / New field added to the Call In screen for Quoted Price**– This is not a required field. If the *Quoted Price* is not filled in, the delivery will be priced as usual by the price listed on the tank. When the *Quoted Price* is filled in, it will be used in Energy Track and manual sales posting to price the delivery.

The screenshot shows the 'Map / Optimizer' interface. At the top, there are several input fields: 'Truck' (0), 'Run' (0), 'Sequence' (0), 'Scheduled' (00/00/00), 'PO Number' (empty), and 'Quoted Price' (1.5000). The 'Quoted Price' field is highlighted with a red rectangular box. Below these fields is a 'Comment' text area.

In Energy Track, the Quoted Price also displays on the Call In which is visible from the call in list and on the tank Call In button.

The screenshot shows the 'Call In' screen. It displays the following information: 'Call In Date' (07/02/26), 'Entered By' (Jenniferne), and 'Quoted Price' (\$1.5000). The 'Quoted Price' field is highlighted with a red rectangular box.

The *Invoice* screen in Energy Track will display *Quoted Price* in the *Priced By* field when a Quoted Price is used in the Call In.

The screenshot shows the 'Invoice' screen. It displays the following information: 'Priced By' (Quoted Price), 'Serial#' (36664), 'Tank Name' (empty), 'Tank Size' (500.00), 'Product' (100), and 'LP RESIDENTIAL BULK'. The 'Priced By' field is highlighted with a red rectangular box. Below the product information is a blue 'Choose' button.

Contracts and Market Based Pricing takes precedence over a quoted call in price. If RET option 42, Allow driver to change overage price, is set to Y, then the driver can now **Select** the *Quoted Price* for a contract overage price. Manual sales posting will use the price on the tank for contract overages.

Select Overage Price

Delivery amount has exceeded the gallons remaining on contract. Please select the price you wish to use for the overage amount.

Cust/Tank Info

Customer **SMITH, ROBERT**

Tank Serial# **923115**

Tank Name **HOUSE**

Contract# **2227**

Price Selection

Contract Price	\$1.6990	Select
Quoted Price	\$1.5000	Select
Daily Price	\$1.9990	Select
Other	\$0.0000	Select

- **Why** – To allow a quoted price to be placed on a Call In and have it carry through to the Invoice without having to change the price on the *Invoice* screen.
- **When/Where** – Both Energy Track and manual sales posting.
- **Action Needed** – No action required.
- **SKYR-1264 / Cash Rounding Added to Payment Posting** – Speed of the Customer Import between Energy Force and Agvance has been increased. All customers will sync not just the new and or modified customers. If *Alternate ID's* are used, the *Energy Force Customer Number* must be filled in for the customer to be synced. Only 1 log file will be generated and will be overwritten daily.
 - **Why** – To alleviate timeout issues on large databases.
 - **When/Where** – Import Customers on Customer Maintenance and the Background Task on the Automated Tasks Menu.
 - **Action Needed** – No action required.

EnergyTrack

- **SKYR-1325 / Adding Items on Cylinder Invoicing**– Adding an Item to a cylinder invoice on Energy Track no longer causes an error.

- **When/Where** – *Invoice* screen.
- **Action Needed** – No action required.
