

Energy Force

- **SKYR-1256 / Batch Edit Tank Utility** – Energy Force has added a batch utility to change the route code on active Tanks, Meters and active Call-Ins. Create the new route prior to running the utility in Energy Force and in Agvance for Agvance users.

Update Tank Route

Updates the route number for all tanks in a specified division, transferring them from one route to another.

Division:

From Route:

To Route:

Cancel

Process

When processed, an entry is created in the audit log and a csv file is generated. The audit log includes *Date*, *Time*, *User* running the utility, and the *From* and *To Routes*. The csv file details include the *Customer*, *Type* (Tank, Meter, or Call-In), *Previous Route*, *New Route*, and if the Tank is *Company-Owned*.

- **Why** – If the Driver Number is also the Route Number and a Driver leaves, the new Driver has a new Driver number to update on the Tanks, Meters and Call-Ins.
- **When/Where** – *Supervisor Menu / Processes / Utility Menu / Update Tank Route*

- **Action Required** – Create new Driver and Route number, then run the utility.
- **SKYR-1392 / Prepaid Sales Tax Included on Contract Import** – Contract Sync also imports prepaid sales tax from Agvance.
 - **Why** – Contract/Booking Sync was not importing prepaid sales tax from Agvance.
 - **When/Where** – *Posting Menu / Contract Import / Contract Import and Supervisor Menu / Maintenance Menu / Automated Tasks Menu / Background Tasks*
 - **Action Required** – No action required.
